PAIGE: (driving the application, introduce the application)

The primary purpose of this application is for patients and doctors to come together in one application for medical scheduling.

Patients and doctors are the users of the application, and each or any doctor's office would sign up to use this service and have their offices displayed.

Landing Page >>

Demonstrates to patients and users how the application can benefit them!

When logged out, someone can view Offices

Shelby Bittner
33230 Euclid Avenue
Cleveland OH 44113

216-801-1149

shelbybittner@gmail.com

Which pushes back to home
Now they can see who they're logged in as in the top left
Next they would select Offices to see what Offices/Doctors the application has to offer

Offices >>

The patient can browse through and choose an office to schedule with based on their needs
You can see here the doctors and the specializations and copay
And also see reviews associated with the offices

See Reviews >>

Jasmine: Patient Scheduling Appointment, Leaving a Review

I'm interested in dermatology so I'm going to choose Visage…

>   *Schedule an Appointment >>*

I'm going to choose Dr. Aisha Sharma…

>   *Calendar Icon >>*
>   *04/22/2024 >>*

Times already taken will not display…

>   *11:00 >>*

This pushes the patient to their My Appointments page

Now, after you've had your doctor's appointment, you can go back to the office to leave a review

>   *Offices >>*
>   *Add Review >>*

>   *Aisha was very attentive and patient when listening to my concerns. Her recommendations helped me regain my confidence!*

>   *See Reviews >>*

Now you can see the new review that your, as the patient, wrote for the office

>   *Logout >>*

Vivek: Doctor > Viewing Upcoming Appointments / Admin > Update Office

Now we're going to login as a doctor…

> *Login >>*
>
> *aishasharma*
> *password*

Now, they can see who they're logged in as in the top left - now, Dr. Aisha Sharma

> *My Appointments >>*

Doctor can view their upcoming appointments

> *Logout >>*

Now we can login as an admin to demonstrate administrative functioning…

> *Login>>*
>
> *admin*
> *password*
>
> *Offices >>*

As an administrator, I can update an office…

> *Update Office >>*

For example, if an office changed location, an admin could update the address…

> *2500 Broadway Avenue*

And we can see here that the office information has changed
